

Before you run My Universe for the first time

My Universe uses **Java** and new versions of **Java** have strict security default which will prevent running any application of this type unless you explicitly allow it.

Here is what you should do:

1. Download the latest JRE (Java Runtime Environment)

Click on the link which describes your computer operating system:

[32-bit Windows](#)

[64-bit Windows](#)

[64-bit Mac OS](#)

Depending on settings of your browser, you may be automatically prompted whether you wish to install JRE (yes, you do!), or you may have to click on the downloaded file in the Download tab or folder to start the installation.

If you encounter problems, please consult this site:
